DMM Records launches new website:

A digital music hub for sound, art and creative freedom

ARTIST LABELS

Daddy Mike - Mike Neon - DMM Soundmachine - Basti & Mike

ARTICLE

With the launch of its new website, DMM Records opens a powerful new chapter. The music label now presents itself with a modern, artistic and fully redesigned online presence that goes far beyond a traditional label website. The new platform is a stage, an archive, an experience space and a creative music hub all in one.

At the heart of the new website are the artists and projects of the label: Daddy Mike, Mike Neon and DMM Soundmachine. Each artist receives their own dedicated space, visual identity and musical atmosphere. Visitors can explore audio previews, discover different sound worlds and experience the creative diversity of DMM Records in a clear, modern and immersive way.

The new website combines structure with art. Clean navigation meets a visual design that does not simply present music, but makes it feel alive. Every section has been created to connect sound, style and brand identity into one premium digital experience. DMM Records shows that music today is not only heard, but also seen, felt and staged.

A key highlight is the new Music Hub Download Portal. This central access point brings together music, downloads, releases and exclusive content in one place. Whether it is audio previews, artist material, music projects or upcoming releases, the Music Hub makes

the world of DMM Records transparent, accessible and professionally organized.

With Daddy Mike, DMM Records presents an artist with character, energy and a distinctive creative signature. Mike Neon brings a bright, modern sound aesthetic into the label universe, standing for electronic elegance, emotion and style. DMM Soundmachine expands the creative spectrum with powerful sound worlds, experimental elements and musical movement.

The new website is more than a technical relaunch. It is a clear statement: DMM Records stands for creative independence, digital presence and musical art without boundaries.

Everything feels intentional, premium and visionary. The platform creates space for music, personality and aesthetics, showing how a modern independent label can evolve when sound, design and artistic ambition come together.

With its new online presence, DMM Records confidently steps into the spotlight and opens the door to a world full of music, emotion, style and creative freedom.

DMM Records is online. The new website is live. The art begins now.
